Outdoor Adjustable Pedestal

PMD & PHD series

Outdoor Adjustable Pedestal

Rhino iPed® outdoor adjustable pedestal is an innovative solution for external raised and ventilated terraces. Technology is based on usage height regulated adjustable pedestals supports which can adjust height of every terrace easily. Terrace supports eliminate water laying on the surface, constant humidity, moss and lichen expansion and water drainage problems. Ventilated terrace allows all time access to waterproof layer and easy maintenance.

Pedestal with spacer tabs

Pedestal with terrace joist

- 1 Support head**
The head, with diameter of 150 mm and surface area of 177 cm² can be fitted with various accessories to cater for different applications
- 2 Adjusting ring**
The adjustment ring allows for easy fine-tuning of the height of the pedestal even with a load placed on top and also it locks the pedestal at required height.
- 3 Couplers**
The Rhino coupler is used to extend the height over 150mm. Two integrated tabs on either side allow for mechanical fixation (cross-wire bracing) where needed.
- 4 Base**
Base diameter 200mm, surface area 314cm² The base can be simply positioned or fixed to any substrate where needed. The head, coupler and the base are equipped with a safety inter-locking system.

Description

Rhino iPed® outdoor adjustable pedestal is an innovative solution for external raised and ventilated terraces. Technology is based on usage height regulated adjustable pedestals supports which can adjust height of every terrace easily. Terrace supports eliminate water laying on the surface, constant humidity, moss and lichen expansion and water drainage problems. Ventilated terrace allows all time access to waterproof layer and easy maintenance.

Top Finishes
